Camera: **Canon EOS 5D Mark III**

Format: **Digital:Full Frame:33MP**

Year: **2024** Month: **September**

**Subject:** Mallards on the Grantham Canal.

**Notes:**

Working with my 1.5x teleconverter and the improved technique with the ball mount tripod head.

The canal is still in a miserable state with no water below Gamston Bridge but there is still a community of Mallards above the lock, near the allotments, although not much else.

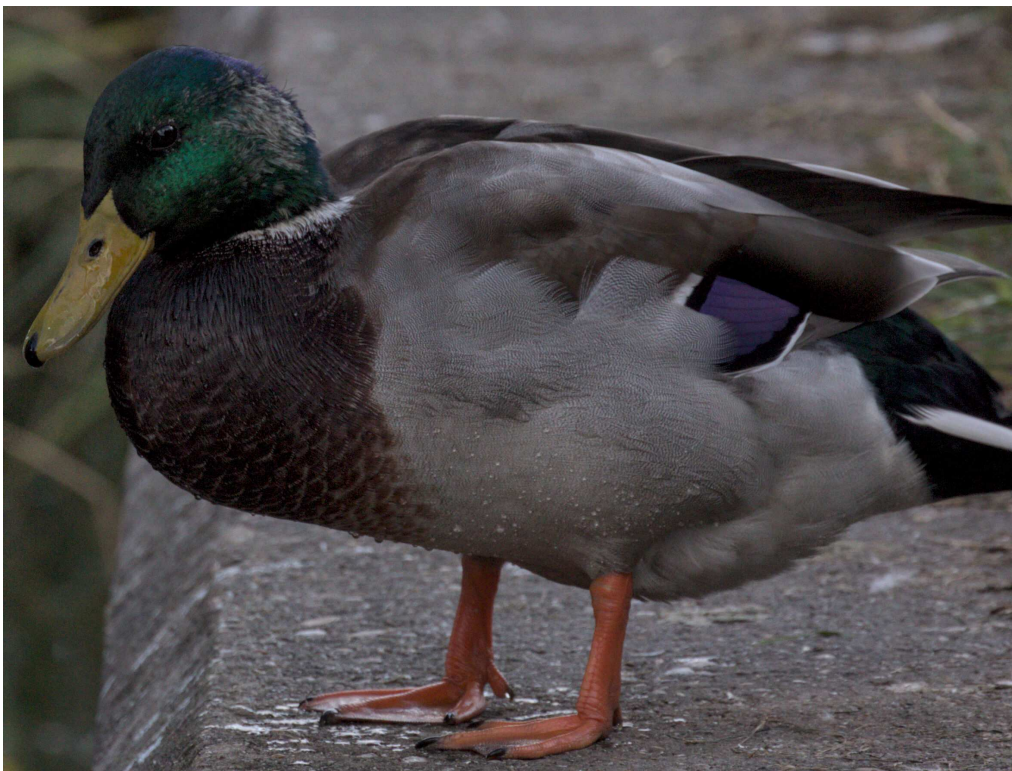

I think I'm becoming something of a whizz with ducks, although still nothing in flight.

**Dates:**

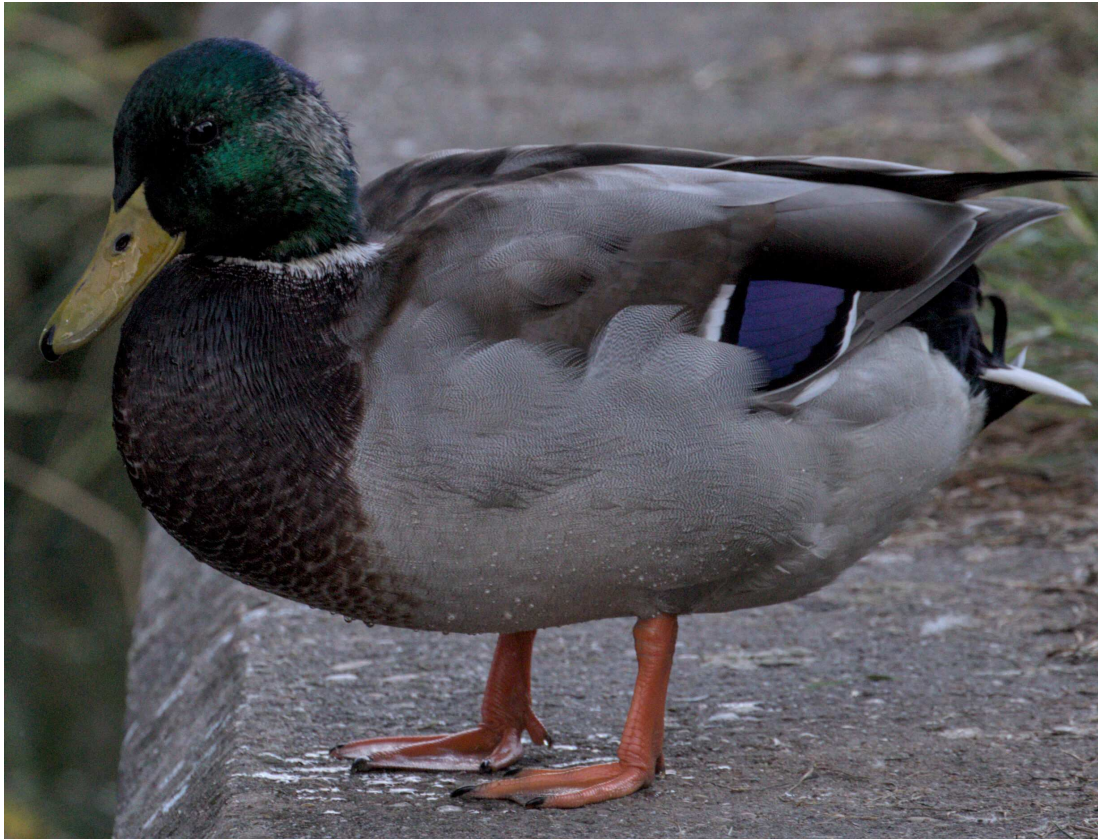

Times and dates are taken from the EXIF metadata. The chronology has been checked and I believe it to be accurate.
